## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:

In the specification page 1, line 2, the US patent application number (or US patent No.) of the disclosed copending application should be provided.

### ***Drawings***

2. The Fig.2a is objected to because fig.2a does not illustrate the center of curvature O as disclosed in the specification page 11, line 13.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Daily (US 5,559,695).

As per claim 1, Daily teaches a time to contact estimate determination for a vehicle, the system comprises: an image receiver for receiving image information relating to a series of at least two recorded images (col.7, lines 10-14); a processor for processing the image information to generate a time-to-contact estimate of the vehicle with the obstacle (col.8, lines 43-50).
